

# HIVE STAND

## Instructions for Assembly

[www.bee-commerce.com](http://www.bee-commerce.com)

1 (203) 222-2268

### Materials:

- 1 Beveled Alighting Board
- 2 Beveled Side Rails
- 1 Short Rabbeted End Piece
- All Nails Required for Assembly

### Assembly:

1. Position the squared end of the two beveled side rails to fit into the rabbeted notches of the short end piece (as the name suggests, this end piece will become the *back* of the hive stand).
2. Drive two nails through the rabbeted ends into the two side rails.
3. Lay the beveled alighting board over the beveled ends of the two long side rails with the bottom flush with the rails at the bottom and sides.
4. Nail each side using 2 or 3 nails. NOTE: Start these nails in the ends of the alighting board while flat on a table. The nails will need to go in at an angle.
5. Congratulations! You are done!
